

acdsee™ Photo Studio Home 2020

The best digital asset manager on the market

As a practical amateur, your photo collection keeps expanding and you need to keep your workflow flowing. With tools expediting digital asset management, productivity, and photo editing and distribution, ACDSee Photo Studio Home 2020 packs a valuable punch. Now featuring face detection and recognition, multiple image baskets for gathering assets from across your hard drive, improved keyword management, converting files in batches, and duplicate finding, Home is filled with efficiency-driven tools to help you inspire your friends, family, and followers.

Effortless Digital Asset Management

Finding, sorting, moving, organizing, and sharing—everything you need for complete mastery over your photography workflow is right here, at your fingertips. Add ratings, hierarchical keywords, categories, and location data to your images. Quickly identify photos for further processing with visual tags or customizable color labels.

Edit Photos

Achieve the perfect conditions you couldn't get in the field by applying fine-tuned adjustments with a toolkit of precision filters. Handle geometric imperfection with cropping, flipping, resizing, and rotation tools. Correct flaws, red eye, blurriness, noise, and clarity. Liven things up by adding text, borders, vignettes, watermarks, and even draw on your image. Select the minute parts of your images you want to impact. Brush on special effects, alterations, and improvements to make your photos exactly what you want them to be.

Face Detection & Facial Recognition (64-bit)

Organizing has never been this personal. ACDSee's Face Detection & Recognition tool will find the humans in your photographs so that you can name the individuals for quick searching. Keep photos distinguished by client, family member, or person of interest. ACDSee will immediately learn which names to put to which faces, even suggesting possible matches. Save hours of tedious manual skimming by searching photos by unnamed, auto-named, and suggested names. Then embed face data in your photos for safe keeping.

Adaptability & Security

Get files from the team over Dropbox™ or OneDrive™ or back up existing work with direct access to cloud sync root drives within Manage mode.

Put Your Files in Many Baskets

Create up to five image baskets to gather and hold images and media files from all over your hard drive. Name individual image baskets and use them to easily view, edit, or share their content.

Improved Duplicate Finder

Find duplicates across a variety of folders and locations. Rename or delete detected duplicates to keep your file collection under control.

RAW Support

Enjoy RAW viewing support for all the latest camera models.

Improved Batch Convert

Convert masses of files into other formats from one convenient, accessible dialog.

Improved Keyword Management

ACDSee now comes pre-loaded with a variety of usable sample quick keyword sets. Export keyword lists and share them with other users. Save countless hours of manual entry by importing established keyword lists.
